

L4.1a Areas Between Curves

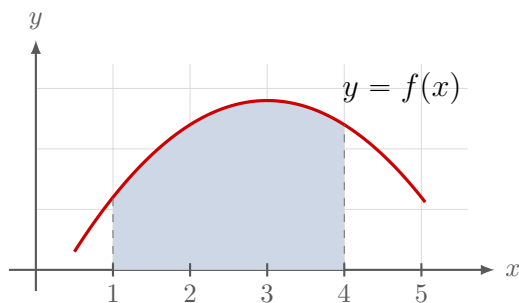

Recall: definite integrals

Name _____

Solo – 9 minutes

1. Evaluate $\int_0^2 (3x^2 - 4x) dx$.

2. The shaded region sits between $y = f(x)$ and the x -axis. **Write the integral** that gives its area. You are not given a formula for f , and you do not need one.

3. Find every point where the graphs of $y = x^2 - 4$ and $y = 3x$ meet.
