

L1.1a Functions & Catalog

Prerequisite check — no prior lesson

Name _____

Solo – 9 minutes

1. $f(x) = 2x^2 - x$. Find $f(3)$, $f(-1)$, and $f(a + 1)$.

2. Find the domain of $g(x) = \frac{\sqrt{x+4}}{x-1}$. Give it in **both** interval and set-builder notation.

3. $f(x) = x^2$. Find the slope of the line through $(2, f(2))$ and $(5, f(5))$.

Now the second point sits only h away, at $(2 + h, f(2 + h))$. What is the slope?
