

L1.3 Continuity

Recall: L1.2 Limits

Name _____

Solo – 9 minutes

1. Evaluate. For each one, say **first** what $f(a)$ came back as, then what the chart told you to do.

(a) $\lim_{x \rightarrow 2} \frac{x^2 + x - 6}{x - 2}$ (b) $\lim_{x \rightarrow 1} \frac{3}{(x - 1)^2}$ (c) $\lim_{x \rightarrow 3} \frac{x^2 + 1}{x + 2}$

For (b), write LHL and RHL separately before you commit to an answer.

2. From the graph, find each value. If it does not exist, say so.

(a) $\lim_{x \rightarrow -1^-} f(x)$ (b) $\lim_{x \rightarrow -1^+} f(x)$ (c) $\lim_{x \rightarrow -1} f(x)$ (d) $f(-1)$ (e) $\lim_{x \rightarrow 1} f(x)$ (f) $f(1)$

3. We have been evaluating limits this whole time by trying $f(a)$ first.

When is it actually OK to just plug in?
