

L4.1b Graphing Functions of y

Recall: areas between curves

Name _____

Solo – 9 minutes

- Find where $y = x^2$ and $y = 2x + 3$ meet, then **write** the integral that gives the area enclosed between them. Do not evaluate it.
- $y = x^3$ and $y = x$ cross once inside $[0, 2]$. Write the set-up for the area between them on $[0, 2]$. Do not evaluate it.
- (a) Complete the table for $x = y^2 - 2y$, then plot the five points (x, y) on the grid and join them with a smooth curve.

y	x
-1	
0	
1	
2	
3	

(b) Can this curve be written as $y = f(x)$? Can it be written as $x = g(y)$? Say how you know.
